- Morphology of human and animal Blastocystis isolates

- Behavioral decision analysis: what makes us sick?
- Blastocystis-host interactions
- Molecular approaches on the systematical position
- Genetic polymorphism
- Blastocystis from a statistical point of view
- Diarrheas due to different agents of disease
- Zoonotic diseases in comparison

As such, this book provides a broad range of information for people working in this field, for physicians and veterinarians who are confronted with clinical cases, teachers, students and technical staff members in the fields of microbiology, parasitology and diagnostic methods.
