Identifying Marine Diatoms and Dinoflagellates is the second identification manual created from the literature developed for the Advanced International Phytoplankton Course. This version, enlarged and modified from the earlier literature, deals with the identification of marine diatoms and dinoflagellates. The data and references presented here should allow the researcher to pursue the question of valid species and how they can be verified.

This volume comprises three chapters, beginning with an introductory chapter discussing the subject's historical background. The next chapter focuses on marine diatoms, providing an introduction that describes their general characteristics, life cycles, morphology and terminology, and classification. It is followed by a discussion of genera represented in marine plankton, a description of taxa, and methodology. The third and final chapter focuses on dinoflagellates, beginning with an introduction that describes their general characteristics and eukaryotic unicells. The discussion continues with terminology and morphology, identification of species, techniques for preparation of dinoflagellates for identification, common dinoflagellate synonyms, and an index of dinoflagellate taxa.

This book will be of interest to practitioners in the fields of biology, zoology, and environmental protection.

From reader reviews:

Walter Miller:

This Identifying Marine Diatoms and Dinoflagellates book is not really ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book is information inside this reserve incredible fresh, you will get data which is getting deeper an individual read a lot of information you will get. That Identifying Marine Diatoms and Dinoflagellates without we realize teach the one who looking at it become critical in pondering and analyzing. Don't end up being worry Identifying Marine Diatoms and Dinoflagellates can bring when you are and not make your handbag space or bookshelves' turn into full because you can have it in your lovely laptop even phone. This Identifying Marine Diatoms and Dinoflagellates having great arrangement in word as well as layout, so you will not experience uninterested in reading.

Mia Shaw:

This book untitled Identifying Marine Diatoms and Dinoflagellates to be one of several books that will best seller in this year, honestly, that is because when you read this reserve you can get a lot of benefit onto it. You will easily to buy this kind of book in the book retail outlet or you can order it by way of online. The publisher on this book sells the e-book too. It makes you more readily to read this book, since you can read this book in your Smart phone. So there is no reason to you personally to past this publication from your list.

Peggy Young:

Reading a book to get new life style in this year; every people loves to study a book. When you learn a book you can get a large amount of benefit. When you read guides, you can improve your knowledge, mainly because book has a lot of information upon it. The information that you will get depend on what forms of book that you have read. In order to get information about your analysis, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, such us novel, comics, as well as soon. The Identifying Marine Diatoms and Dinoflagellates provide you with a new experience in reading a book.

Jose Rivera:

As we know that book is very important thing to add our information for everything. By a book we can know everything we wish. A book is a group of written, printed, illustrated as well as blank sheet. Every year was exactly added. This reserve Identifying Marine Diatoms and Dinoflagellates was filled about science. Spend your extra time to add your knowledge about your scientific disciplines competence. Some people has various feel when they reading any book. If you know how big benefit of a book, you can experience enjoy to read a e-book. In the modern era like right now, many ways to get book which you wanted.
