Physical Properties and Applications of Polymer Nanocomposites (Woodhead Publishing Series in Composites Science and Engineering)

Polymer nanocomposites are polymer matrices reinforced with nano-scale fillers. This new class of composite materials has shown improved mechanical and physical properties. The latter include enhanced optical, electrical and dielectric properties. This important book begins by examining the characteristics of the main types of polymer nanocomposites, then reviews their diverse applications.

Part one focuses on polymer/nanoparticle composites, their synthesis, optical properties and electrical conductivity. Part two describes the electrical, dielectric and thermal behaviour of polymer/nanoplatelet composites, whilst polymer/nanotube composites are the subject of Part three. The processing and industrial applications of these nanocomposite materials are discussed in Part four, including uses in fuel cells, bioimaging and sensors as well as the manufacture and applications of electrospun polymer nanocomposite fibers, nanostructured transition metal oxides, clay nanofiller/epoxy nanocomposites, hybrid epoxy-silica-rubber nanocomposites and other rubber-based nanocomposites.

Polymer nanocomposites: Physical properties and applications is a valuable reference tool for both the research community and industry professionals wanting to learn about these materials and their applications in such areas as fuel cell, sensor and biomedical technology.

- Examines the characteristics of the main types of polymer nanocomposites and reviews their diverse applications
- Comprehensively assesses polymer/nanoparticle composites exploring experimental techniques and data associated with the conductivity and dielectric characterization
- A specific section on polymer/nanotube composites features electrical and dielectric behaviour of polymer/carbon nanotube composites

From reader reviews:

David Ashworth:

Here thing why this particular Physical Properties and Applications of Polymer Nanocomposites (Woodhead Publishing Series in Composites Science and Engineering) are different and trustworthy to be yours. First of all examining a book is good but it depends in the content from it which is the content is as delightful as food or not. Physical Properties and Applications of Polymer Nanocomposites (Woodhead Publishing Series in Composites Science and Engineering) giving you information deeper as different ways, you can find any publication out there but there is no reserve that similar with Physical Properties and Applications of Polymer Nanocomposites (Woodhead Publishing Series in Composites Science and Engineering). It gives you thrill looking at journey, its open up your own personal eyes about the thing that happened in the world which is maybe can be happened around you. You can actually bring everywhere like in playground, café, or even in your way home by train. For anyone who is having difficulties in bringing the branded book maybe the form of Physical Properties and Applications of Polymer Nanocomposites (Woodhead Publishing Series in Composites Science and Engineering) in e-book can be your alternative.

Clifford Hudgins:

Spent a free the perfect time to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their own friends. Usually they performing activity like watching television, likely to beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Would you like to something different to fill your personal free time/ holiday? Might be reading a book may be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to try out look for book, may be the book untitled Physical Properties and Applications of Polymer Nanocomposites (Woodhead Publishing Series in Composites Science and Engineering) can be fine book to read. May be it could be best activity to you.

Young Legg:

Reading can called thoughts hangout, why? Because when you find yourself reading a book specially book entitled Physical Properties and Applications of Polymer Nanocomposites (Woodhead Publishing Series in Composites Science and Engineering) your brain will drift away trough every dimension, wandering in every aspect that maybe unknown for but surely can be your mind friends. Imaging each and every word written in a e-book then become one web form conclusion and explanation in which maybe you never get prior to. The Physical Properties and Applications of Polymer Nanocomposites (Woodhead Publishing Series in Composites Science and Engineering) giving you one more experience more than blown away your head but also giving you useful information for your better life in this particular era. So now let us explain to you the relaxing pattern the following is your body and mind will probably be pleased when you are finished reading through it, like winning a sport. Do you want to try this extraordinary paying spare time activity?

Chad Smith:

Physical Properties and Applications of Polymer Nanocomposites (Woodhead Publishing Series in Composites Science and Engineering) can be one of your beginner books that are good idea. Many of us recommend that straight away because this guide has good vocabulary that can increase your knowledge in words, easy to understand, bit entertaining but nonetheless delivering the information. The author giving his/her effort that will put every word into delight arrangement in writing Physical Properties and Applications of Polymer Nanocomposites (Woodhead Publishing Series in Composites Science and Engineering) although doesn't forget the main point, giving the reader the hottest in addition to based confirm resource details that maybe you can be among it. This great information can drawn you into fresh stage of crucial thinking.
