Bachelor Thesis from the year 2011 in the subject Engineering - Power Engineering, grade: "-", Atlantic International University, course: Petroleum Engineering - Phytoremediation, language: English, abstract: Abstract.

Phytoremediation is the use of plants and its associated microorganisms to achieve the conditions necessary to facilitate the breakdown of contaminants and clean-up of the polluted environment. Phytoremediation technology is viewed as the simplest way of handling variety of contaminants in many sectors of oil industry.

The community of microorganisms in the rhizosphere has been shown to be involved in degradation of numerous contaminants, including pesticides, polynuclear aromatic hydrocarbons, petroleum compounds, volatile organic chemicals, and in organics. Also, plants can degrade contaminants during plant metabolic activities; for instance, 2,4,6-trinitrotoluene has been shown to be degraded by plant enzymes. Plants can use contaminants as nutrients; nitrate contamination of ground water can serve as a nitrogen source for plants. This involves the achieving condition of ground water, waste oil and produced water from oil facilities. Phytoremediation is recommended because of its establishment at low -cost and with flexibility in wide aspect of soil environmental remediation. Practical field experiments and laboratory water quality test analysis carried out in an oil field in TharJath-south Sudan by using reed species called *Phragmites australis* has shown promising results.

It is common perennial grasses that thrive best in wetlands and temperate tropical part of the world. Southern part of the Sudan being temperate and tropical region is suitable for this reed species to thrive well. This Thesis provides a real analytical test and report on the effective clean up of the polluted environment by the use of reed plants through phytoremediation process. Hence will encourage future studies on remediation of the contaminated soil.

From reader reviews:

Ruth Irizarry:

Book is usually written, printed, or highlighted for everything. You can realize everything you want by a guide. Book has a different type. To be sure that book is important matter to bring us around the world. Alongside that you can your reading skill was fluently. A reserve Phytoremediation in reed plants treat and clean up polluted environment by petroleum produced water will make you to always be smarter. You can feel more confidence if you can know about every thing. But some of you think which open or reading a book make you bored. It is not necessarily make you fun. Why they might be thought like that? Have you trying to find best book or suitable book with you?

Harold Hutchison:

Hey guys, do you desires to finds a new book to learn? May be the book with the headline Phytoremediation in reed plants treat and clean up polluted environment by petroleum produced water suitable to you? The actual book was written by well known writer in this era. Typically the book untitled Phytoremediation in reed plants treat and clean up polluted environment by petroleum produced water is the main of several books which everyone read now. That book was inspired many men and women in the world. When you read this publication you will enter the new dimension that you ever know ahead of. The author explained their concept in the simple way, and so all of people can easily to know the core of this book. This book will give you a great deal of information about this world now. In order to see the represented of the world within this book.

Elizabeth Jamerson:

Many people spending their time by playing outside with friends, fun activity having family or just watching TV the whole day. You can have new activity to invest your whole day by examining a book. Ugh, you think reading a book can definitely hard because you have to accept the book everywhere? It fine you can have the e-book, delivering everywhere you want in your Touch screen phone. Like Phytoremediation in reed plants treat and clean up polluted environment by petroleum produced water which is finding the e-book version. So , why not try out this book? Let's observe.

Douglas Johnson:

Is it you actually who having spare time and then spend it whole day by means of watching television programs or just resting on the bed? Do you need something totally new? This Phytoremediation in reed plants treat and clean up polluted environment by petroleum produced water can be the respond to, oh how comes? A book you know. You are consequently out of date, spending your time by reading in this brand new era is common not a nerd activity. So what these books have than the others?
