Get mobile messaging going on virtually any platform, in any language

Mobile Application Development Using SMS and the SIM Toolkit is just the guide you've been looking for if you're building applications for GSM or 3G networks, wish you had sample code for reality-based applications, or want to add mobile extensions to your software products and corporate network. In this straight-talking tutorial, smart card expert Scott Guthery teams with information management specialist Mary Cronin to provide you with authoritative guidance on SIM application design, integration, and management for any platform. Seasoned developers will quickly learn how to:

- Create code that harnesses the power of the SIM
- Use the micro-browsers and micro-Web servers in 3G phones
- Construct leading-edge mobile commerce applications on today's network
- Send and receive SMS messages from your server or your laptop
- Enable interfaces and other needed components
- Create secure wireless applications for corporate networks and VPNs
