**Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods: Volume 2 (Springer Series in Advanced Manufacturing)** R. Venkata Rao

*Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods* presents the concepts and details of applications of MADM methods. A range of methods are covered including Analytic Hierarchy Process (AHP), Technique for Order Preference by Similarity to Ideal Solution (TOPSIS), VIšekriterijumsko KOmpromisno Rangiranje (VIKOR), Data Envelopment Analysis (DEA), Preference Ranking METHod for Enrichment Evaluations (PROMETHEE), ELimination Et Choix Traduisant la Réalité (ELECTRE), COMplex PROportional ASsessment (COPRAS), Grey Relational Analysis (GRA), UTility Additive (UTA), and Ordered Weighted Averaging (OWA).

The existing MADM methods are improved upon and three novel multiple attribute decision making methods for solving the decision making problems of the manufacturing environment are proposed. The concept of integrated weights is introduced in the proposed subjective and objective integrated weights (SOIW) method and the weighted Euclidean distance based approach (WEDBA) to consider both the decision maker's subjective preferences as well as the distribution of the attributes data of the decision matrix. These methods, which use fuzzy logic to convert the qualitative attributes into the quantitative attributes, are supported by various real-world application examples. Also, computer codes for AHP, TOPSIS, DEA, PROMETHEE, ELECTRE, COPRAS, and SOIW methods are included.

This comprehensive coverage makes *Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods* a key reference for the designers, manufacturing engineers, practitioners, managers, institutes involved in both design and manufacturing related projects. It is also an ideal study resource for applied research workers, academicians, and students in mechanical and industrial engineering.

**From reader reviews:**

**Thomas Berg:**

Do you considered one of people who can't read pleasant if the sentence chained within the straightway, hold on guys that aren't like that. This Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods: Volume 2 (Springer Series in Advanced Manufacturing) book is readable by simply you who hate the perfect word style. You will find the information here are arrange for enjoyable reading experience without leaving actually decrease the knowledge that want to provide to you. The writer associated with Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods: Volume 2 (Springer Series in Advanced Manufacturing) content conveys the idea easily to understand by lots of people. The printed and e-book are not different in the articles but it just different by means of it. So , do you continue to thinking Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods: Volume 2 (Springer Series in Advanced Manufacturing) is not loveable to be your top checklist reading book?

**John Ashton:**

Beside this kind of Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods: Volume 2 (Springer Series in Advanced Manufacturing) in your phone, it can give you a way to get nearer to the new knowledge or data. The information and the knowledge you might got here is fresh from oven so don't possibly be worry if you feel like an outdated people live in narrow village. It is good thing to have Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods: Volume 2 (Springer Series in Advanced Manufacturing) because this book offers to your account readable information. Do you occasionally have book but you do not get what it's interesting features of. Oh come on, that would not happen if you have this with your hand. The Enjoyable agreement here cannot be questionable, such as treasuring beautiful island. Techniques you still want to miss the idea? Find this book in addition to read it from today!

**Jocelyn Welch:**

As we know that book is very important thing to add our expertise for everything. By a e-book we can know everything we wish. A book is a group of written, printed, illustrated or perhaps blank sheet. Every year ended up being exactly added. This guide Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods: Volume 2 (Springer Series in Advanced Manufacturing) was filled in relation to science. Spend your free time to add your knowledge about your research competence. Some people has diverse feel when they reading any book. If you know how big selling point of a book, you can experience enjoy to read a e-book. In the modern era like now, many ways to get book that you wanted.

**Myron Mendez:**

As a university student exactly feel bored to help reading. If their teacher questioned them to go to the library or to make summary for some book, they are complained. Just very little students that has reading's heart or real their interest. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that examining is not important, boring as well as can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this Decision Making in Manufacturing Environment Using Graph Theory and Fuzzy Multiple Attribute Decision Making Methods: Volume 2 (Springer Series in Advanced Manufacturing) can make you really feel more interested to read.
