Space, Time, Matter, and Form: Essays on Aristotle's Physics (Oxford Aristotle Studies) David Bostock

Space, Time, Matter, and Form collects ten of David Bostock's essays on themes from Aristotle's *Physics*, four of them published here for the first time. The first five papers look at issues raised in the first two books of the *Physics*, centered on notions of matter and form; the latter five examine themes in the remaining books, including infinity, place, time, and continuity. Bostock's many insights will be welcomed by all scholars of ancient philosophy.
