Surveys in General Topology

George Reed

Surveys in General Topology George Reed

Surveys in General Topology presents topics relating to general topology ranging from closed mappings and ultrafilters to covering and separation properties of box products. Ordered topological spaces and the use of combinatorial techniques in functional analysis are also considered, along with product spaces and weakly compact subsets of Banach spaces. Applications of stationary sets in topology are presented as well.

Comprised of 15 chapters, this volume begins with an analysis of some of the techniques and results in the area of closed mappings, followed by a discussion on the theory of ultrafilters. The reader is then introduced to the question of when a box product of compact spaces is paracompact, and how badly a box product of compact or metrizable spaces can fail to be normal. Subsequent chapters focus on the transfinite dimension; the properties of metacompactness, submetacompactness, and subparacompactness; the dimension of ordered topological spaces; the use of combinatorial techniques for the treatment and solution of fundamental problems in functional analysis, particularly in the isomorphic theory of Banach spaces; and order-theoretic base axioms.

This monograph will be of significant value both to researchers in general topology and to mathematicians outside the field who wish an overview of current topics and techniques.

From reader reviews:

Luz Davis:

Reading a reserve can be one of a lot of action that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people fantastic. First reading a book will give you a lot of new info. When you read a publication you will get new information since book is one of a number of ways to share the information or perhaps their idea. Second, reading through a book will make you more imaginative. When you examining a book especially fiction book the author will bring you to definitely imagine the story how the personas do it anything. Third, you may share your knowledge to other individuals. When you read this Surveys in General Topology, it is possible to tells your family, friends as well as soon about yours e-book. Your knowledge can inspire others, make them reading a publication.

Thelma Scott:

Many people spending their time by playing outside along with friends, fun activity using family or just watching TV the entire day. You can have new activity to spend your whole day by examining a book. Ugh, do you think reading a book really can hard because you have to bring the book everywhere? It fine you can have the e-book, bringing everywhere you want in your Smart phone. Like Surveys in General Topology which is having the e-book version. So , try out this book? Let's observe.

Sophia Hartman:

Don't be worry should you be afraid that this book can filled the space in your house, you could have it in e-book technique, more simple and reachable. This kind of Surveys in General Topology can give you a lot of close friends because by you looking at this one book you have issue that they don't and make anyone more like an interesting person. This particular book can be one of one step for you to get success. This e-book offer you information that maybe your friend doesn't recognize, by knowing more than different make you to be great persons. So , why hesitate? We should have Surveys in General Topology.

Henry Taylor:

Do you like reading a e-book? Confuse to looking for your best book? Or your book ended up being rare? Why so many query for the book? But just about any people feel that they enjoy to get reading. Some people likes examining, not only science book but in addition novel and Surveys in General Topology or maybe others sources were given understanding for you. After you know how the truly great a book, you feel desire to read more and more. Science publication was created for teacher or students especially. Those publications are helping them to add their knowledge. In various other case, beside science reserve, any other book likes Surveys in General Topology to make your spare time much more colorful. Many types of book like this.
