Extreme Value Modeling and Risk Analysis: Methods and Applications

Extreme Value Modeling and Risk Analysis: Methods and Applications

Extreme Value Modeling and Risk Analysis: Methods and Applications presents a broad overview of statistical modeling of extreme events along with the most recent methodologies and various applications. The book brings together background material and advanced topics, eliminating the need to sort through the massive amount of literature on the subject.

After reviewing univariate extreme value analysis and multivariate extremes, the book explains univariate extreme value mixture modeling, threshold selection in extreme value analysis, and threshold modeling of non-stationary extremes. It presents new results for block-maxima of vine copulas, develops time series of extremes with applications from climatology, describes max-autoregressive and moving maxima models for extremes, and discusses spatial extremes and max-stable processes. The book then covers simulation and conditional simulation of max-stable processes; inference methodologies, such as composite likelihood, Bayesian inference, and approximate Bayesian computation; and inferences about extreme quantiles and extreme dependence. It also explores novel applications of extreme value modeling, including financial investments, insurance and financial risk management, weather and climate disasters, clinical trials, and sports statistics.

Risk analyses related to extreme events require the combined expertise of statisticians and domain experts in climatology, hydrology, finance, insurance, sports, and other fields. This book connects statistical/mathematical research with critical decision and risk assessment/management applications to stimulate more collaboration between these statisticians and specialists.

From reader reviews:

Sharon Bedgood:

What do you about book? It is not important with you? Or just adding material if you want something to explain what the one you have problem? How about your free time? Or are you busy individual? If you don't have spare time to perform others business, it is make you feel bored faster. And you have free time? What did you do? Everyone has many questions above. They should answer that question mainly because just their can do which. It said that about publication. Book is familiar in each person. Yes, it is proper. Because start from on pre-school until university need this kind of Extreme Value Modeling and Risk Analysis: Methods and Applications to read.

Jacqueline Kellett:

Now a day folks who Living in the era wherever everything reachable by interact with the internet and the resources inside can be true or not need people to be aware of each info they get. How a lot more to be smart in getting any information nowadays? Of course the solution is reading a book. Reading through a book can help folks out of this uncertainty Information particularly this Extreme Value Modeling and Risk Analysis: Methods and Applications book because book offers you rich facts and knowledge. Of course the knowledge in this book hundred per-cent guarantees there is no doubt in it you probably know this.

Jessica Duncan:

Hey guys, do you wishes to finds a new book to learn? May be the book with the subject Extreme Value Modeling and Risk Analysis: Methods and Applications suitable to you? The actual book was written by well known writer in this era. The book untitled Extreme Value Modeling and Risk Analysis: Methods and Applications is the main one of several books this everyone read now. That book was inspired lots of people in the world. When you read this book you will enter the new shape that you ever know ahead of. The author explained their thought in the simple way, therefore all of people can easily to recognise the core of this publication. This book will give you a lots of information about this world now. To help you to see the represented of the world within this book.

Jamie Harper:

Many people spending their time period by playing outside with friends, fun activity using family or just watching TV all day every day. You can have new activity to enjoy your whole day by looking at a book. Ugh, think reading a book can really hard because you have to take the book everywhere? It fine you can have the e-book, having everywhere you want in your Cell phone. Like Extreme Value Modeling and Risk Analysis: Methods and Applications which is finding the e-book version. So , why not try out this book? Let's view.
