## Consumption in Asia: Lifestyle and Identities (The New Rich in Asia)

The essays in this collection challenge conventional ideas about consumption and consumerism: they consider if the inundation of Western consumer goods have created identity confusions among the affluent in Asia, and if the expansion of consumer culture really does threaten the stability of politically anti-liberal states in Asia. This is the first book to analyse in detail consumerism in the region, and will be valuable reading for students and researchers in Asian studies, economics, politics and cultural studies.
