An Introduction to Medicinal Chemistry Graham L. Patrick

Many of us think nothing of taking a painkiller to ease a headache, or to relieve the symptoms of 'flu. But how do drugs have their effect in the human body? How are new drugs discovered and designed to be as effective as possible? An Introduction to Medicinal Chemistry offers an engaging insight into the one field of chemistry that arguably has the greatest impact on our quality of life than any other.

Newly structured into four parts, the book opens in Part A with an introduction to pharmacodynamics and pharmacokinetics. Pharmacodynamics considers the types of molecular targets used by drugs, the interactions which are involved when a drug meets that target, and the consequences of those interactions. Pharmacokinetics considers the issues involved in a drug reaching its target in the first place. Part B goes on to examine the general principles and strategies involved in discovering and designing new drugs and developing them for the marketplace, while Part C looks at particular 'tools of the trade' which are invaluable in those processes. Finally, Part D covers a selection of specific topics within medicinal chemistry. Reflecting a change in emphasis in medicinal chemistry research, this Part takes us from the largely trial-and-error approach to drug design to the rational approach, and explores the most recent advances in molecular biology and genetics which have revolutionised drug design.

With a striking new two-colour text design, and greatly enriched learning features, the third edition conveys the fascination of working in a field which overlaps the disciplines of chemistry, biochemistry, physiology, microbiology, cell biology, and pharmacology. A must-have textbook for any student of medicinal chemistry.

Companion Web Site

- Figures available to download, to facilitate lecture preparation
- 3D molecular structures, to enable students to visualise key structures in an interactive way
- Multiple choice questions with answers, to support and encourage independent learning

From reader reviews:

Evelyn White:

You are able to spend your free time to learn this book this book. This An Introduction to Medicinal Chemistry is simple to deliver you can read it in the park your car, in the beach, train along with soon. If you did not possess much space to bring the printed book, you can buy the e-book. It is make you simpler to read it. You can save typically the book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.

John Armstead:

Is it anyone who having spare time after that spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something totally new? This An Introduction to Medicinal Chemistry can be the solution, oh how comes? The new book you know. You are thus out of date, spending your spare time by reading in this new era is common not a nerd activity. So what these textbooks have than the others?

Juan Hinkson:

A lot of book has printed but it differs. You can get it by online on social media. You can choose the most beneficial book for you, science, comic, novel, or whatever by simply searching from it. It is known as of book An Introduction to Medicinal Chemistry. You can include your knowledge by it. Without leaving the printed book, it could add your knowledge and make a person happier to read. It is most essential that, you must aware about reserve. It can bring you from one location to other place.

Fred Garza:

What is your hobby? Have you heard that will question when you got learners? We believe that that question was given by teacher with their students. Many kinds of hobby, Every person has different hobby. And also you know that little person including reading or as reading through become their hobby. You must know that reading is very important and also book as to be the matter. Book is important thing to increase you knowledge, except your own personal teacher or lecturer. You find good news or update about something by book. Many kinds of books that can you choose to use be your object. One of them is this An Introduction to Medicinal Chemistry.
