Gravitation and Spacetime

Hans C. Ohanian, Remo Ruffini

Gravitation and Spacetime Hans C. Ohanian, Remo Ruffini

The third edition of this classic textbook is a quantitative introduction for advanced undergraduates and graduate students. It gently guides students from Newton's gravitational theory to special relativity, and then to the relativistic theory of gravitation. General relativity is approached from several perspectives: as a theory constructed by analogy with Maxwell's electrodynamics, as a relativistic generalization of Newton's theory, and as a theory of curved spacetime. The authors provide a concise overview of the important concepts and formulas, coupled with the experimental results underpinning the latest research in the field. Numerous exercises in Newtonian gravitational theory and Maxwell's equations help students master essential concepts for advanced work in general relativity, while detailed spacetime diagrams encourage them to think in terms of four-dimensional geometry. Featuring comprehensive reviews of recent experimental and observational data, the text concludes with chapters on cosmology and the physics of the Big Bang and inflation.

From reader reviews:

Theodore May:

Your reading 6th sense will not betray anyone, why because this Gravitation and Spacetime guide written by well-known writer who really knows well how to make book which can be understand by anyone who have read the book. Written inside good manner for you, leaking every ideas and composing skill only for eliminate your own hunger then you still uncertainty Gravitation and Spacetime as good book not merely by the cover but also through the content. This is one guide that can break don't ascertain book by its cover, so do you still needing an additional sixth sense to pick that!? Oh come on your reading through sixth sense already told you so why you have to listening to one more sixth sense.

Nancy Smith:

The book untitled Gravitation and Spacetime contain a lot of information on the idea. The writer explains the girl idea with easy method. The language is very clear to see all the people, so do not necessarily worry, you can easy to read it. The book was authored by famous author. The author provides you in the new period of time of literary works. You can actually read this book because you can read more your smart phone, or gadget, so you can read the book within anywhere and anytime. If you want to buy the e-book, you can wide open their official web-site as well as order it. Have a nice read.

Jeanie Clark:

Many people spending their time frame by playing outside with friends, fun activity with family or just watching TV the entire day. You can have new activity to invest your whole day by reading a book. Ugh, think reading a book can actually hard because you have to bring the book everywhere? It okay you can have the e-book, delivering everywhere you want in your Cell phone. Like Gravitation and Spacetime which is finding the e-book version. So , try out this book? Let's notice.

Jessica Harris:

Do you like reading a book? Confuse to looking for your chosen book? Or your book had been rare? Why so many issue for the book? But almost any people feel that they enjoy regarding reading. Some people likes studying, not only science book and also novel and Gravitation and Spacetime or maybe others sources were given knowledge for you. After you know how the truly amazing a book, you feel need to read more and more. Science book was created for teacher as well as students especially. Those textbooks are helping them to increase their knowledge. In some other case, beside science reserve, any other book likes Gravitation and Spacetime to make your spare time much more colorful. Many types of book like this one.
