Cybercrime

Gráinne Kirwan, Andrew Power

Cybercrime Gráinne Kirwan, Andrew Power

Cybercrime is a growing problem in the modern world. Despite the many advantages of computers, they have spawned a number of crimes, such as hacking and virus writing, and made other crimes more prevalent and easier to commit, including music piracy, identity theft and child sex offences. Understanding the psychology behind these crimes helps to determine what motivates and characterises offenders and how such crimes can be prevented. This textbook on the psychology of the cybercriminal is the first written for undergraduate and postgraduate students of psychology, criminology, law, forensic science and computer science. It requires no specific background knowledge and covers legal issues, offenders, effects on victims, punishment and preventative measures for a wide range of cybercrimes. Introductory chapters on forensic psychology and the legal issues of cybercrime ease students into the subject, and many pedagogical features in the book and online provide support for the student.
