**Equations of Mathematical Physics (Dover Books on Physics)** A. N. Tikhonov, A. A. Samarskii

Mathematical physics plays an important role in the study of many physical processes — hydrodynamics, elasticity, and electrodynamics, to name just a few. Because of the enormous range and variety of problems dealt with by mathematical physics, this thorough advanced undergraduate- or graduate-level text considers only those problems leading to partial differential equations.

Contents:

- I. Classification of Partial Differential Equations
- II. Evaluations of the Hyperbolic Type
- III. Equations of the Parabolic Type
- IV. Equations of Elliptic Type
- V. Wave Propagation in Space
- VI. Heat Conduction in Space
- VII. Equations of Elliptic Type (Continuation)

The authors — two well-known Russian mathematicians — have focused on typical physical processes and the principal types of equations dealing with them. Special attention is paid throughout to mathematical formulation, rigorous solutions, and physical interpretation of the results obtained. Carefully chosen problems designed to promote technical skills are contained in each chapter, along with extremely useful appendixes that supply applications of solution methods described in the main text. At the end of the book, a helpful supplement discusses special functions, including spherical and cylindrical functions.

### **From reader reviews:**

#### **Mark Hofmeister:**

Information is provisions for individuals to get better life, information currently can get by anyone at everywhere. The information can be a expertise or any news even a huge concern. What people must be consider while those information which is in the former life are hard to be find than now is taking seriously which one would work to believe or which one typically the resource are convinced. If you get the unstable resource then you obtain it as your main information there will be huge disadvantage for you. All those possibilities will not happen inside you if you take Equations of Mathematical Physics (Dover Books on Physics) as your daily resource information.

#### **Jennifer Oaks:**

Typically the book Equations of Mathematical Physics (Dover Books on Physics) will bring someone to the new experience of reading a new book. The author style to explain the idea is very unique. In the event you try to find new book you just read, this book very suited to you. The book Equations of Mathematical Physics (Dover Books on Physics) is much recommended to you you just read. You can also get the e-book through the official web site, so you can more readily to read the book.

#### **Mary Summers:**

Often the book Equations of Mathematical Physics (Dover Books on Physics) has a lot details on it. So when you check out this book you can get a lot of help. The book was compiled by the very famous author. The writer makes some research ahead of write this book. That book very easy to read you can get the point easily after perusing this book.

#### **Kathy Donnelly:**

Reading a publication make you to get more knowledge from that. You can take knowledge and information coming from a book. Book is prepared or printed or highlighted from each source this filled update of news. In this modern era like at this point, many ways to get information are available for you. From media social such as newspaper, magazines, science e-book, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Are you ready to spend your spare time to spread out your book? Or just looking for the Equations of Mathematical Physics (Dover Books on Physics) when you required it?
