Electromagnetic Waves and Transmission Lines R.S. Rao

Although electromagnetics is one of the oldest and fully developed subjects, yet it is considered, by the students at large, the most difficult subject. Keeping this view in mind, the present book is written in an easy-to-understand language, without missing the essence of the subject matter. The book provides an in-depth analysis of all the major areas of the subject such as fields, waves and lines. The topics included and discussed in the book are selected in such a way that they serve as a true text to the basic communication engineering subjects such as antennas, microwave engineering and so on. The book is supplemented by the inclusion of a large number of solved and unsolved problems, which will enhance the analytical skill of the students. The problems are framed to test the conceptual understanding of the students. The book also contains innumerable number of objective type questions in different types, such as matching type, fill-in-the-blank type and multiple-choice type with their answers. It is intended as a textbook for the undergraduate students of Electrical and Electronics Engineering and Electronics and Communication Engineering for their course on Electromagnetic Waves and Transmission Lines.
