Remote Sensing of Coastal Environments (Remote Sensing Applications Series)

Remote Sensing of Coastal Environments (Remote Sensing Applications Series)

As coastal environments around the world face unprecedented natural and anthropogenic threats, advancements in the technologies that support geospatial data acquisition, imaging, and computing have profoundly enhanced monitoring capabilities in coastal studies. Providing systematic treatment of the key developments, **Remote Sensing of Coastal Environments** brings together renowned scholars to supply a clear presentation of the state-of-the-art in this technically complex arena.

Edited by a recipient of the prestigious PECASE award, this book provides unrivaled coverage of the issues unique to coastal environments. It presents the best available data for measuring and monitoring coastal zones and explains how decision makers and resource managers can use this data to address contemporary issues in coastal zone management. The text illustrates the latest developments in active remote sensing, hyperspectral remote sensing, high spatial resolution remote sensing, the integration of remote sensing and *in situ* data, and covers the effects of land-cover and land-use change on coastal environments.

Complete with representative case studies, this authoritative resource provides a timely snapshot of the wide range of remote sensing applications in coastal issues to enhance the understanding of how increasing disturbances to our coastal regions are affecting the ecological dynamics, biological diversity, and ecosystem health of our coastal environments.

From reader reviews:

Frank Keating:

Nowadays reading books be than want or need but also become a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge the actual information inside the book this improve your knowledge and information. The information you get based on what kind of publication you read, if you want attract knowledge just go with education and learning books but if you want really feel happy read one together with theme for entertaining including comic or novel. Often the Remote Sensing of Coastal Environments (Remote Sensing Applications Series) is kind of guide which is giving the reader unstable experience.

Scott Peters:

Are you kind of occupied person, only have 10 as well as 15 minute in your morning to upgrading your mind expertise or thinking skill possibly analytical thinking? Then you are having problem with the book in comparison with can satisfy your short period of time to read it because pretty much everything time you only find e-book that need more time to be study. Remote Sensing of Coastal Environments (Remote Sensing Applications Series) can be your answer because it can be read by anyone who have those short extra time problems.

Nancy Hunt:

In this particular era which is the greater person or who has ability in doing something more are more important than other. Do you want to become one among it? It is just simple way to have that. What you are related is just spending your time very little but quite enough to get a look at some books. Among the books in the top collection in your reading list is Remote Sensing of Coastal Environments (Remote Sensing Applications Series). This book and that is qualified as The Hungry Slopes can get you closer in growing to be precious person. By looking upwards and review this reserve you can get many advantages.

Robert Oshea:

As a pupil exactly feel bored for you to reading. If their teacher expected them to go to the library or even make summary for some book, they are complained. Just tiny students that has reading's internal or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading significantly. Any students feel that looking at is not important, boring along with can't see colorful images on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this Remote Sensing of Coastal Environments (Remote Sensing Applications Series) can make you sense more interested to read.
