Solving Problems in Food Engineering (Food Engineering Series) Stavros Yanniotis

Solving Problems in Food Engineering is a step by step workbook intended to enhance students' understanding of complicated concepts and to help them practice solving food engineering problems. The book covers problems in fluid flow, heat transfer, mass transfer, and the most common unit operations that have applications in food processing, such as thermal processing, cooling and freezing, evaporation, psychrometrics and drying. Included are theoretical questions in the form of true or false, solved problems, semi-solved problems, and problems solved using a computer. The semi-solved problems guide students through the solution. Some of the problems progress from elementary level increasing difficulty so that the book is useful to food science as well as food engineering students. Aus den Rezensionen: '... Das Buch ist mit Sicherheit eine Bereicherung für alle, die mit dem Vermitteln von Verständnis für lebensmitteltechnische Berechnungen in ihrer ganzen Bandbreite befasst sind. Auf der dem Buch beiliegenden CD sind einige komplexere Beispiele in Microsoft Excel zu finden - wenn auch mit etwas gewöhnungsbedürftiger Farbgestaltung ...' (Prof. Dr. Harald Rohm, in: Lebensmitteltechnik, 2008, Vol. 40, Issue 6, S. 65)

From reader reviews:

Carlos Garcia:

Within other case, little individuals like to read book Solving Problems in Food Engineering (Food Engineering Series). You can choose the best book if you want reading a book. Given that we know about how is important the book Solving Problems in Food Engineering (Food Engineering Series). You can add knowledge and of course you can around the world by just a book. Absolutely right, due to the fact from book you can realize everything! From your country right up until foreign or abroad you will find yourself known. About simple issue until wonderful thing you may know that. In this era, we are able to open a book or perhaps searching by internet product. It is called e-book. You can use it when you feel weary to go to the library. Let's learn.

Margarita Toman:

Book is to be different for each grade. Book for children right up until adult are different content. As you may know that book is very important for all of us. The book Solving Problems in Food Engineering (Food Engineering Series) was making you to know about other know-how and of course you can take more information. It is quite advantages for you. The book Solving Problems in Food Engineering (Food Engineering Series) is not only giving you far more new information but also to get your friend when you feel bored. You can spend your own spend time to read your publication. Try to make relationship with all the book Solving Problems in Food Engineering (Food Engineering Series). You never experience lose out for everything in the event you read some books.

Mike Huey:

Information is provisions for those to get better life, information currently can get by anyone with everywhere. The information can be a know-how or any news even a huge concern. What people must be consider if those information which is inside former life are challenging be find than now is taking seriously which one is suitable to believe or which one the resource are convinced. If you get the unstable resource then you buy it as your main information you will have huge disadvantage for you. All of those possibilities will not happen throughout you if you take Solving Problems in Food Engineering (Food Engineering Series) as your daily resource information.

Edward McCain:

Typically the book Solving Problems in Food Engineering (Food Engineering Series) will bring that you the new experience of reading some sort of book. The author style to elucidate the idea is very unique. Should you try to find new book to study, this book very acceptable to you. The book Solving Problems in Food Engineering (Food Engineering Series) is much recommended to you to see. You can also get the e-book from the official web site, so you can more readily to read the book.
