Geostatistical Reservoir Modeling

Michael J. Pyrcz, Clayton V. Deutsch

Geostatistical Reservoir Modeling Michael J. Pyrcz, Clayton V. Deutsch

Published in 2002, the first edition of *Geostatistical Reservoir Modeling* brought the practice of petroleum geostatistics into a coherent framework, focusing on tools, techniques, examples, and guidance. It emphasized the interaction between geophysicists, geologists, and engineers, and was received well by professionals, academics, and both graduate and undergraduate students.

In this revised second edition, Deutsch collaborates with co-author Michael Pyrcz to provide an expanded (in coverage and format), full color illustrated, more comprehensive treatment of the subject with a full update on the latest tools, methods, practice, and research in the field of petroleum Geostatistics.

Key geostatistical concepts such as integration of geologic data and concepts, scale considerations, and uncertainty models receive greater attention, and new comprehensive sections are provided on preliminary geological modeling concepts, data inventory, conceptual model, problem formulation, large scale modeling, multiple point-based simulation and event-based modeling. Geostatistical methods are extensively illustrated through enhanced schematics, work flows and examples with discussion on method capabilities and selection. For example, this expanded second edition includes extensive discussion on the process of moving from an inventory of data and concepts through conceptual model to problem formulation to solve practical reservoir problems.

A greater number of examples are included, with a set of practical geostatistical studies developed to illustrate the steps from data analysis and cleaning to post-processing, and ranking. New methods, which have developed in the field since the publication of the first edition, are discussed, such as models for integration of diverse data sources, multiple point-based simulation, event-based simulation, spatial bootstrap and methods to summarize geostatistical realizations.

From reader reviews:

Christopher McCrady:

Have you spare time for a day? What do you do when you have far more or little spare time? That's why, you can choose the suitable activity regarding spend your time. Any person spent their spare time to take a wander, shopping, or went to often the Mall. How about open or perhaps read a book allowed Geostatistical Reservoir Modeling? Maybe it is for being best activity for you. You know beside you can spend your time using your favorite's book, you can smarter than before. Do you agree with the opinion or you have additional opinion?

Summer McGaugh:

Playing with family in a very park, coming to see the coastal world or hanging out with good friends is thing that usually you have done when you have spare time, subsequently why you don't try factor that really opposite from that. One activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Geostatistical Reservoir Modeling, you are able to enjoy both. It is fine combination right, you still want to miss it? What kind of hangout type is it? Oh come on its mind hangout people. What? Still don't obtain it, oh come on its referred to as reading friends.

Beverly Hummell:

Many people spending their moment by playing outside with friends, fun activity along with family or just watching TV the entire day. You can have new activity to enjoy your whole day by studying a book. Ugh, ya think reading a book can definitely hard because you have to accept the book everywhere? It all right you can have the e-book, delivering everywhere you want in your Mobile phone. Like Geostatistical Reservoir Modeling which is getting the e-book version. So , why not try out this book? Let's see.

Arlene Wilson:

That reserve can make you to feel relax. This book Geostatistical Reservoir Modeling was colourful and of course has pictures around. As we know that book Geostatistical Reservoir Modeling has many kinds or style. Start from kids until young adults. For example Naruto or Investigator Conan you can read and feel that you are the character on there. So , not at all of book tend to be make you bored, any it can make you feel happy, fun and relax. Try to choose the best book for you personally and try to like reading in which.
