**The Hydrogen Bond and the Water Molecule: The Physics and Chemistry of Water, Aqueous and Bio-Media** Yves Marechal

**The Hydrogen Bond and the Water Molecule** offers a synthesis of what is known and currently being researched on the topic of hydrogen bonds and water molecules. The most simple water molecular, H<sub>2</sub>O, is a fascinating but poorly understood molecule. Its unique ability to attract an exceptionally large number of hydrogen bonds induces the formation of a dense "hydrogen bond network" that has the potential to modify the properties of the surrounding molecules and their reactivities. The crucial role that water molecules play is described in this book. The author begins by providing an overview of the thermodynamical and structural properties of H-bonds before examining their much less known dynamical properties, which makes them appear as centres of reactivity. Methods used to observe these components are also reviewed. In the second part of the book the role played by the dense H-bond network developed by H<sub>2</sub>O molecules is examined. First in ice, where it has important atmospheric consequences, then in liquid water, and finally in macromolecules where it sheds some original light on the fundamental question "How is it that without water and hydrogen bonds life would not exist?".

This book will be of interest to researchers in the fields of physics, chemistry, biochemistry and molecular biology. It can also serve as a teaching aid for students attending course in chemical physics, chemistry or molecular biology. Engineers involved the water industry would benefit from reading this book, as would scientists working in pharmaceuticals, cosmetics and materials.

- \* overview of what is known and being researched on the topic of hydrogen bonds and water molecules
- \* reviews methods used to observe interactions between water molecules and hydrogen bonds
- \* examines role of H-bond network developed by H<sub>2</sub>O molecules

### **From reader reviews:**

#### **William Vogt:**

This book entitled The Hydrogen Bond and the Water Molecule: The Physics and Chemistry of Water, Aqueous and Bio-Media to be one of several books in which best seller in this year, that is because when you read this reserve you can get a lot of benefit on it. You will easily to buy this kind of book in the book retail store or you can order it through online. The publisher of this book sells the e-book too. It makes you easier to read this book, as you can read this book in your Cell phone. So there is no reason for your requirements to past this reserve from your list.

#### **Carissa Ware:**

The guide with title The Hydrogen Bond and the Water Molecule: The Physics and Chemistry of Water, Aqueous and Bio-Media has a lot of information that you can understand it. You can get a lot of advantage after read this book. This kind of book exist new know-how the information that exist in this reserve represented the condition of the world now. That is important to you to know how the improvement of the world. This kind of book will bring you in new era of the global growth. You can read the e-book on your own smart phone, so you can read the item anywhere you want.

#### **Princess Bequette:**

As we know that book is important thing to add our knowledge for everything. By a book we can know everything you want. A book is a list of written, printed, illustrated or even blank sheet. Every year seemed to be exactly added. This publication The Hydrogen Bond and the Water Molecule: The Physics and Chemistry of Water, Aqueous and Bio-Media was filled with regards to science. Spend your extra time to add your knowledge about your research competence. Some people has distinct feel when they reading the book. If you know how big selling point of a book, you can feel enjoy to read a reserve. In the modern era like at this point, many ways to get book that you simply wanted.

#### **Rudy Hendren:**

As a student exactly feel bored to reading. If their teacher questioned them to go to the library in order to make summary for some e-book, they are complained. Just small students that has reading's internal or real their passion. They just do what the educator want, like asked to the library. They go to generally there but nothing reading seriously. Any students feel that examining is not important, boring in addition to can't see colorful pics on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore, this The Hydrogen Bond and the Water Molecule: The Physics and Chemistry of Water, Aqueous and Bio-Media can make you experience more interested to read.
