Eighth International Conference on Water Pollution Research: Proceedings of the 8th International Conference, Sydney, Australia, 1976 (Progress in Water Technology)

Water Pollution Research covers the proceedings of the Eighth International Conference on Water Pollution Research, held in Sydney, Australia on October 17-22, 1976.

This book is composed of 150 and begins with discussions of the different sources of water pollution, including aerosolization, viral contamination, hydrocarbons, and heavy metals. Considerable chapters are devoted to various chemical processes for wastewater management; technical requirements for standard water quality; and methods of pollutant analysis. These topics are followed by surveys of Sydney's design of ocean outfall, an integrated pollution control system, and sewage sludge disposal. Other chapters describe the features of wastewater treatment reactors and other treatment alternatives. The remaining chapters present various case studies demonstrating the performance and improvements of different wastewater treatment facilities.

This book will prove useful to water pollution researchers, environmentalists, and design engineers.
