Symmetry Breaking in Syntax (Cambridge Studies in Linguistics, 136) Hubert Haider

In this illuminating new theory of grammar, Hubert Haider demonstrates that there is a basic asymmetry in the phrase structure of any language, whatever sentence structure it takes. Moreover, he argues that understanding this asymmetry is the key to understanding the grammatical causality underlying a broad range of core syntactic phenomena. Until now, Germanic languages have been seen to fall into two distinct classes: those which take an object-verb sentence structure (OV) or a verb-object one (VO). However, by examining the nature of this universal underlying asymmetry, Hubert Haider reveals a third syntactic type: 'Type III'. In particular, he employs the third type to explore the cognitive evolution of grammar which gave rise to the structural asymmetry and its typological implications. *Symmetry Breaking in Syntax* will appeal to academic researchers and graduate students involved in comparative and theoretical syntax and the cognitive evolution of grammar.
